(STEM-2024)

22 - 23 March, 2023

Organized by

Department of Mechanical & Civil Engineering

Amritsar Group of Colleges, Amritsar

ABOUT THE COLLEGE

Amritsar Group of Colleges (AGC), formerly known as Amritsar College of Engineering & Technology/ Amritsar Pharmacy College was established by Amritsar International Education Trust in 2002. This premier institute has been duly approved by AICTE/PCI. AGC with its magnificent environment and superior learning system is ranked among the best colleges in North India. AGC is affiliated with I.K.G Punjab Technical University, Kapurthala, and accredited by the National Board of Accreditation (2009-12 & 2016-18) and the National Assessment & Accreditation Council (NAAC) with Grade 'A'. AGC became the first private Autonomous Engineering College in Punjab on 19th June 2014. Its tremendous growth in a short period explicates its success in the education sector. The institute endeavors to educate the students to become not only competent professionals but also excellent human beings who contribute towards the welfare of the society and raise the quality of life of its people. The Institute has been established with a noble aim and vision to produce professionals of the highest caliber and values for industry and society.

ABOUT THE CONFERENCE

Amritsar Group of Colleges (AGC Amritsar), proudly announcing National Conference on "Science Technology Engineering and Management" (STEM-2024) on March 22-23, 2024. The aim of the conference is related to the sustainable goals in Science, Technology, Engineering, and Management (STEM). These goals and targets include the 2030 Agenda for Sustainable Development Goals (SDGs). The focus is to target papers related to innovation in industries with science and technology (SDG 9). The sustainable manufacturing processes, re-manufacturing, induction of IoT, Artificial Intelligence and Machine Learning in Industry. This encompasses enhancing regional and international cooperation on science, technology, and innovation, strengthening the means of implementation, and revitalizing global partnerships for sustainable development. The conference also seeks to ensure access to affordable, reliable, sustainable, and modern energy for all while promoting sustained, inclusive, sustainable buildings and clean energy (SDG 07).

Objectives

- Implementation of Sustainable processes in Industry and infrastructures.
- Role of Experts systems via. Machine learning, Artificial Intelligence in industry.
- Recent technological trends in Computer Science and Electronics Engineering in-line with various engineering applications.
- Role of SDGs in Industry for economic growth.

CALL FOR PAPERS

We invite high quality submissions describing original and unpublished results of theoretical, empirical, conceptual, and experimental work in the following themes (but not limited to)

THEMES / SUBTHEMES

Sustainable and Advanced Remanufacturing Processes

- Joining Processes: Casting, welding, Brazing, Soldering etc.
- Assessing affordability-based design methodologies that consider environmental factors for advanced manufacturing;
- Implementing design for remanufacturing, recycling and recovery.
- Methods for assessing sustainability in manufacturing (e.g. life cycle assessment, material flow analysis, carbon footprint of manufacturing processes) and their impact on plant performance.
- Materials/energy/resource utilisation factors, waste minimisation/management
- Use of new sustainable materials in processes (e.g. bio-lubricants) and their impact on environment and plant performance.
- Case studies and comparison of manufacturing processes based on their sustainability.
- Implementing real-time energy efficiency assessment of components and systems;
- Optimizing the design and advanced manufacturing processes for optimizing energy and material's efficiency;
- Optimizing process technologies for transforming scrap into reusable raw materials;
- Optimizing process planning and process scheduling for advanced manufacturing, especially in the context of low fossil-carbon and sustainability dimensions;
- Optimizing manufacturing systems under multiple sustainability criteria, such as economic feasibility, fossil-carbon emissions, and energy consumption;
- Monitoring and reducing the fossil-carbon energy footprints in advanced manufacturing process planning and production scheduling.

Sustainable Products and Development

- The influence of sustainable product innovation
- The application of digital technologies such as artificial intelligence, Big Data analytics, blockchain, cloud computing, digital twins, and the Internet of Things to new product development (NPD) and innovation.
- Sustainable innovation practices in new product development and role in supply chains.
- Sustainability performance evaluation for NPD and supply chains.
- Sustainable product/service design framework, technologies, and case studies.
- Data-driven new sustainable product development.
- Failure mode and effect analysis in sustainable product development.
- Decision making in managing innovation and sustainability in new product development.
- Human-centric product/service design technologies, and case studies.

Sustainable Cities and Society

- Resilient environments and smart cities.
- Distributed energy generation, alternative/clean energy sources, and management/reduction of energy consumption.
- Maintaining and enhancing air quality in cities and built environments (e. g. management of healthy built environments and air quality);

- Green and energy-efficient structures and communities.
- Mitigation and adaptation to climate change in urban settings.
- Green building practises and BMPs.
- Management and accounting of environmental footprints.
- Urban forestry and agriculture
- Intelligent infrastructure, the smart grid, and ICT.
- Urban planning and design, rules, laws, accreditation, economics, and policy.
- The resilience and social effects of cities.
- Behaviour analysis, change, and observation in urban areas.
- Monitoring and enhancing one's health.
- Converging concerns for sustainable cities and society.
- Trade-off and uncertainty analysis decision support systems for better management of cities and society.
- Case studies and applications of big data, machine learning, and artificial intelligence.
- Critical infrastructure protection, encompassing difficulties with cyber-physical system stability, security, privacy, and forensics.
- Urban water management and water distribution, harvesting, purification, and reuse.
- Recycling and waste reduction.
- Collection, treatment, and recycling of wastewater.
- Transportation infrastructure and systems that are intelligent, clean, and healthy.

Modeling, Analysis and Optimization of Manufacturing Processes

- Computing in Applied Mechanics
- CAD/CAM/CIM/HVAC/CAE and Product Design
- Dynamics and Control of Structures/Systems
- Fracture and Failure Mechanics
- Solid Mechanics: Differential / Dynamical systems
- Modeling and Simulation
- Artificial Intelligence: Fuzzy Logic, Neural Network, Genetic Algorithm etc.
- Finite Element Analysis
- Advanced Numerical Techniques
- Advancements in Tribology
- Nanomechanics and MEMS
- Modeling, Analysis and Simulation of Manufacturing Processes
- Multi-objective optimization
- Applications of mathematical modeling and optimization theory and methods in various areas
- Process monitoring and control

Sustainable Cities and Society

- Smart grid technology
- Advanced manufacturing processes for electrical components
- Innovation in power distribution and transmission
- Infrastructure for sustainable energy production
- Smart city solutions involving electric grids and infrastructure
- Development of sustainable electrical systems for buildings and communities
- Integration of electric transport into urban environments
- Resilient and sustainable energy supply for urban areas

Sustainable, Affordable, and Clean Energy

- Biofuels and bioenergy
- Coal energy
- Carbon capture, storage, and utilization
- Decarbonization of energy systems
- Energy from waste
- Flexible generation and storage of Energy
- Energy efficiency
- Environmental impacts of smart technologies
- Environmental impacts of energy sources
- Non-Conventional Energy
- Energy transition
- Gas energy
- Geothermal energy
- Greenhouse gas removal
- Nuclear energy
- Oil shale energy
- Petroleum and processing industry
- Smart technologies in energy applications
- Solar energy
- Wind energy

Good Health, Well-Being, and Sustainability

- Digital Health
- Personalized Medicine
- Prevention and Early Intervention
- Environmental Health
- Global Health Security
- Mental Health
- Health Equity
- Development of Quality Pharmaceuticals
- Formulation and development
- Drug design and discovery
- Pharmacology and toxicology
- Quality control and assurance
- Complementary and alternative medicines
- Sustainable healthcare practices
- Personalized medicine
- Health and nutrients

PUBLICATIONS

After peer reviewing selected papers will be published in conference book proceeding (with ISBN No.) and high quality research papers will be sent for publication to our publication partners in reputed international journals (indexed in SCOPUS, Google Scholar)

SUBMISSION GUIDELINES

- The Cover Page Should Contain the Title, Author Name, Affiliation Address and Email Id.
- The length of the paper should not exceed 5000 words excluding Title page and References. It must be accompanied by an abstract/ summary (not exceeding 300 words) followed by 4-5 keywords.
- Paper Should be single column docs file (docs format).
- It should be typed in Roman New Style, as per following format;

Paper Title: 14 points, capitals, bold, centred

Author Names(s): 12 points, title case, centred (Corresponding author shall be indicated by superscript* after the name)

Affiliation: 10 points, centre d

Abstract: 12 points, *italics*, justified.

Text: Heading 12 points, Title case, Bold, left aligned

Body Text 12 points justified

Figure and tables: Centred

Figure Caption & Table Tittles: 12 points, bold, centred.

References: As per APA Style (Singh, G., Vasudev, H., Bansal, A., & Vardhan, S. (2020). Microwave cladding of Inconel-625 on mild steel substrate for corrosion protection. *Materials Research Express*, 7(2), 026512.).

IMPORTANT DATES

Registration and Full Paper Submission Deadline	February 17, 2024

ABSTRACT

Friction Stir Processing (FSP) of AISI 4337 steel was done with Tungsten carbide (wc) tool under two different rotational speeds 100rpm and 200rpm, with feed rate of 30 mm/min and plunge depth of 1 mm. The mechanical properties like micro hardness, tensile and bending were studied. After annealing process, the carbide particles were observed in original martensite phase. According to the increase in grain size. Good strength-ductility observed with YS of 650 Mpa and 970 Mpa. This is may be fact that increase in the grain boundaries decreases in the grain size. Friction stir processing also modified the properties of AISI 4337 steel microstructure.

Keywords: Friction Stir Processing, Mechanical Properties

INTRODUCTION

All things considered, the automotive industry having different experience sorts of surface dislikable like wear and corrosion. In oil hardware parts in Hydro turbine and gearbox. FSP is a method to change and microstructural control of surface thin layers of control steel parts for property improvement. It is powerful innovation for microstructure refinement, densification, and homogenization. FSP is a great way to deal with improving the refinement of the microstructure and mechanical properties of the material [1, 2]. In FSP the deserved parameter is used with the speed of rotational and longitudinal. It has been seen in the parameters that to handle the level of microstructure refinement of a grain. To control the calculated information and level of tensile in the material where the microstructure of the prepared material.

FSP is a new solid-state technique. In FSP as shown in figure.1 has four local the phases which are the district that is a thermo-mechanically prepared zone in which the grains measured is refined and homogenized. The thermo-mechanically affected zone (TMAZ) in which the grain is lengthened like it was mechanically distorted. The heat affected zone (HAZ) that as a same grain structure of the base material (BM) is the local that was unprocessed material. The unprocessed material incorporating the HAZ, its unique pre-prepared state i.e. parent material (PM) [3]. The examined on FSPed steels is as yet constrained because of the controlling and the founding stage change [4, 5]. In another side, the ultrafine grains changed their stage structure can be acquired in medium carbon steel by means of FSP and its great mechanical properties [6-7]. In the further examination on FSP of steels, the development of microstructure is the impact on the FSP steel mechanical properties.

Figure 1: Schematic of Friction Stir Processing Process

ABOUT THE CONFERENCE

Amritsar Group of Colleges (AGC Amritsar), proudly announcing National Conference on "Science Technology Engineering and Management" (STEM-2024) on March 22-23, 2024. The aim of the conference is related to the sustainable goals in Science, Technology, Engineering, and Management (STEM). These goals and targets include the 2030 Agenda for Sustainable Development Goals (SDGs). The focus is to target papers related to innovation in industries with science and technology (SDG 9). The sustainable manufacturing processes, re-manufacturing, induction of IoT, Artificial Intelligence and Machine Learning in Industry. This encompasses enhancing regional and international cooperation on science, technology, and innovation, strengthening the means of implementation, and revitalizing global partnerships for sustainable development. The conference also seeks to ensure access to affordable, reliable, sustainable, and modern energy for all while promoting sustained, inclusive, sustainable buildings and clean energy (SDG 07).

Objectives

- Implementation of Sustainable processes in Industry and infrastructures.
- Role of Experts systems via. Machine learning, Artificial Intelligence in industry.
- Recent technological trends in Computer Science and Electronics Engineering in-line with various engineering applications.
- Role of SDGs in Industry for economic growth.

CALL FOR PAPERS

We invite high quality submissions describing original and unpublished results of theoretical, empirical, conceptual, and experimental work in the following themes (but not limited to)

THEMES / SUBTHEMES

Sustainable and Advanced Remanufacturing Processes

- Joining Processes: Casting, welding, Brazing, Soldering etc.
- Assessing affordability-based design methodologies that consider environmental factors for advanced manufacturing;
- Implementing design for remanufacturing, recycling and recovery.
- Methods for assessing sustainability in manufacturing (e.g. life cycle assessment, material flow analysis, carbon footprint of manufacturing processes) and their impact on plant performance.
- Materials/energy/resource utilisation factors, waste minimisation/management
- Use of new sustainable materials in processes (e.g. bio-lubricants) and their impact on environment and plant performance.
- Case studies and comparison of manufacturing processes based on their sustainability.
- Implementing real-time energy efficiency assessment of components and systems;
- Optimizing the design and advanced manufacturing processes for optimizing energy and material's efficiency;
- Optimizing process technologies for transforming scrap into reusable raw materials;
- Optimizing process planning and process scheduling for advanced manufacturing, especially in the context of low fossil-carbon and sustainability dimensions;
- Optimizing manufacturing systems under multiple sustainability criteria, such as economic feasibility, fossil-carbon emissions, and energy consumption;
- Monitoring and reducing the fossil-carbon energy footprints in advanced manufacturing process planning and production scheduling.

Sustainable Products and Development

- The influence of sustainable product innovation
- The application of digital technologies such as artificial intelligence, Big Data analytics, blockchain, cloud computing, digital twins, and the Internet of Things to new product development (NPD) and innovation.
- Sustainable innovation practices in new product development and role in supply chains.
- Sustainability performance evaluation for NPD and supply chains.
- Sustainable product/service design framework, technologies, and case studies.
- Data-driven new sustainable product development.
- Failure mode and effect analysis in sustainable product development.
- Decision making in managing innovation and sustainability in new product development.
- Human-centric product/service design technologies, and case studies.

Sustainable Cities and Society

- Resilient environments and smart cities.
- Distributed energy generation, alternative/clean energy sources, and management/reduction of energy consumption.
- Maintaining and enhancing air quality in cities and built environments (e. g., management of healthy built environments and air quality);

- Green and energy-efficient structures and communities.
- Mitigation and adaptation to climate change in urban settings.
- Green building practises and BMPs.
- Management and accounting of environmental footprints.
- Urban forestry and agriculture
- Intelligent infrastructure, the smart grid, and ICT.
- Urban planning and design, rules, laws, accreditation, economics, and policy.
- The resilience and social effects of cities.
- Behaviour analysis, change, and observation in urban areas.
- Monitoring and enhancing one's health.
- Converging concerns for sustainable cities and society.
- Trade-off and uncertainty analysis decision support systems for better management of cities and society.
- Case studies and applications of big data, machine learning, and artificial intelligence.
- Critical infrastructure protection, encompassing difficulties with cyber-physical system stability, security, privacy, and forensics.
- Urban water management and water distribution, harvesting, purification, and reuse.
- Recycling and waste reduction.
- Collection, treatment, and recycling of wastewater.
- Transportation infrastructure and systems that are intelligent, clean, and healthy.

Modeling, Analysis and Optimization of Manufacturing Processes

- Computing in Applied Mechanics
- CAD/CAM/CIM/HVAC/CAE and Product Design
- Dynamics and Control of Structures/ Systems
- Fracture and Failure Mechanics
- Solid Mechanics: Differential / Dynamical systems
- Modeling and Simulation
- Artificial Intelligence: Fuzzy Logic, Neural Network, Genetic Algorithm etc.
- Finite Element Analysis

- Advancements in Tribology
- Nanomechanics and MEMS
- Modeling, Analysis and Simulation of Manufacturing Processes
- Multi-objective optimization
- Applications of mathematical modeling and optimization theory and methods in various areas
- Process monitoring and control

Sustainable Cities and Society

- Smart grid technology
- Advanced manufacturing processes for electrical components
- Innovation in power distribution and transmission
- Infrastructure for sustainable energy production
- Smart city solutions involving electric grids and infrastructure
- Development of sustainable electrical systems for buildings and communities
- Integration of electric transport into urban environments
- Resilient and sustainable energy supply for urban areas

Sustainable, Affordable, and Clean Energy

- Biofuels and bioenergy
- Coal energy
- Carbon capture, storage, and utilization
- Decarbonization of energy systems
- Energy from waste
- Flexible generation and storage of Energy
- Energy efficiency
- Environmental impacts of smart technologies
- Environmental impacts of energy sources
- Non-Conventional Energy
- Energy transition
- Gas energy
- Geothermal energy
- Greenhouse gas removal
- Nuclear energy
- Oil shale energy
- Petroleum and processing industry
- Smart technologies in energy applications
- Solar energy
- Wind energy

Good Health, Well-Being, and Sustainability

- Digital Health
- Personalized Medicine
- Prevention and Early Intervention
- Environmental Health
- Global Health Security
- Mental Health
- Health Equity
- Development of Quality Pharmaceuticals
- Formulation and development
- Drug design and discovery
- Pharmacology and toxicology
- Quality control and assurance
- Complementary and alternative medicines
- Sustainable healthcare practices
- Personalized medicine
- Health and nutritions

ABSTRACT

In this study, an efficient and affordable microwave technique was used to clad a stainless steel (SS-316) substrate with Inconel-625. For the cladding process, a household microwave oven with operational ratings of 900 W and 2.45 GHz was employed. The mean microhardness of the obtained clad was considerably better than that of the substrate (SS-316).

Keywords: Microwave Cladding, Inconel-625, Microwave Hybrid Heating

INTRODUCTION

A superalloy based on nickel called Inconel-625 (IN625) has numerous advantageous properties. These include its resilience to corrosion in harsh chemical conditions, exceptional creep resistance at high temperatures, and resistance to strain age cracking. Additionally, Inconel-625 has higher formability and better welding workability compared to other highly alloyed nickel-based alloys. Because of these unique characteristics, this superalloy is a fantastic option for the materials that are utilized in a wide range of sectors, including the chemical, power generation, aerospace, petrochemical & marine industries [1]. However, the expensive price of Inconel-625 has limited its use in large-scale manufacturing. One of the widely utilized techniques for the improvement of surface properties, as well as material function without modifying the majority of properties, is known as surface engineering. Various engineering applications use Stainless steel as one of the common material. Various methods can be used for ferrous alloy's surface modification are thermal spraying, CVD, PVD, heat treatment, laser cladding and microwave cladding etc. [2, 3]. Because of the factors like easiness in operation as well as being able to build a variety of materials on substrate, one of the most common technique that is used widely nowadays is thermal spraying. Although, limitations associated with thermal spray technique includes porosity and splats' poor mechanical bonding [4-6]. Furthermore, when high accuracy is required for performing the cladding on the small components then laser cladding is used, which has a high cost of operation. Furthermore, in the laser cladding process, during the rapid melt pool solidification there exists a crack formation tendency [7-8]. Presently, there exists one more popular technique namely, microwave processing of materials, as it has various advantages like volumetric heating, uniform heating as well as because of the enhanced microstructural characteristics it possesses improved mechanical properties. Furthermore, in the materials' microwave processing, at the atomic level heat is produced, which further results in the enhanced productivity as well as lower consumption of energy. Also, during this process the material which owed to the atomic level interaction resulted in generation of volumetric heat inside it in comparison to the conventional surface heating techniques where conductive mode of heat transfer is used. Thus, material resulted in decreased thermal gradient inside it which results in enhanced functional properties along with decreased residual stresses inside the material. Firstly, gave the microwave heating application as microwave cladding for enhancement of metallic material's functional properties in a patent form. MHH (Microwave Hybrid Heating) technique's principle was used by the authors for microwave clad development.

EXPERIMENTAL DETAIL

DETAIL OF MATERIAL

Superalloy Inconel-625, Ni-based based powder Purchased from (M/S Metallizing Equipment), Jodhpur (India). was selected for cladding due to high hardness and corrosion resistance. Fig 1 SEM micrograph shows that display the morphology of Inconel-625 powder. The majority of the powder particles with a diameter of 40

CIRCULAR SLOT ENABLED PATCH ANTENNA FOR 5G COMMUNICATION SYSTEMS

Navdeep SinghSunil Thakur*

**Department of Applied Sciences, Amritsar Group of Colleges, Amritsar, Punjab*

***Department of Physics, DAV College, Jalandhar*

Corresponding Author: Email ID: arora_navdeep@rediffmail.com

ABSTRACT

This work demonstrates the use of circular slots to excite antenna resonance in mm-Wave band. A compact antenna for high frequency 5G applications is discussed. The antenna is designed using mathematical equations on RT-Duroid (5880) substrate. The mathematical design is modified to optimize antenna design by adding circular slots on ground and patch of antenna. The numerical study of the antenna is performed and the effect of variation of circular slot radius on antenna performance is studied. The antenna resonates at 28.1GHz with reflection coefficient of -36.71dB and gain 4.99dBi. The antenna shows broad resonance bandwidth of 1.5GHz and exhibits good matching with the feedline.

Keywords: Reflection Coefficient · Gain · VSWR · Bandwidth · Slot · 5G · mm-Wave band.

INTRODUCTION

Modern wireless communication systems require high transmission bit rates, wide signal bandwidth to handle network traffic with moderate budget and better coverage [1]. To fulfill the needs of modern communication systems, mm-Wave band is being explored extensively by various researchers [4,6,9,12,15,17]. The 2015 World Radio Communication Conference had allocated 2486GHz frequency band as mm-Wave band [6]. The innate properties of this frequency band like short wavelength, wide bandwidth make it suitable for fifth generation network applications [9]. Consequently on July 2016 [13], the Communications Federal Commission (FCC) selected the frequency bands 28 GHz (27.5–28.35 GHz), 38 GHz (37–38.6 GHz) and 39 GHz (38.6–40 GHz) for fifth generation services and applications. So there is a need of designing new antennas for mm-Wave applications. The prerequisites for the antenna design to be conformal with 5G applications are compact size, enhanced bandwidth with high gain.

Various researchers [4,15,17] have used periodic rectangular slots on the patch, to obtain a compact high gain antenna for 5G applications. The use of parasitic elements [4] along the radiating patch also enhances the antenna performance in mm-Wave band. The bandwidth of the antenna in above discussions was moderate. But Raisat et.al [7] investigated the effect of rectangular slots on ground plane and deduced that bandwidth can be improved by adding slots on ground plane of the antenna. Further by using circular slots [14] the radiation characteristics of the antenna can be enhanced greatly. Researchers have also turned to inset feed [2,9,12], substrate integrated waveguide (SIW) [13], slotted waveguide antenna [5] to modify antenna characteristics for various applications. While waveguide integrated antenna is costly, also it becomes difficult to obtain printed antenna. A lot of research has also occurred in field of MIMO antennas [3,10,11,16], but the antenna designs are bulky.

The literature lacks compact sized wideband antennas having simple and planar geometry with high gain for 5G applications. Based on the missing links of the literature, a compact patch antenna is proposed in this study. Its design is approximated by using mathematical design equations, while optimised design is obtained by studying numerical simulations. The variation of radiation parameters of optimised antenna is studied.

ABOUT THE COLLEGE

Amritsar Group of Colleges (AGC), formerly known as Amritsar College of Engineering & Technology/ Amritsar Pharmacy College was established by Amritsar International Education Trust in 2002. This premier institute has been duly approved by AICTE/PCI. AGC with its magnificent environment and superior learning system is ranked among the best colleges in North India. AGC is affiliated with I.K.G Punjab Technical University, Kapurthala, and accredited by the National Board of Accreditation (2009-12 & 2016-18) and the National Assessment & Accreditation Council (NAAC) with Grade 'A'. AGC became the first private Autonomous Engineering College in Punjab on 19th June 2014. Its tremendous growth in a short period explicates its success in the education sector. The institute endeavors to educate the students to become not only competent professionals but also excellent human beings who contribute towards the welfare of the society and raise the quality of life of its people. The Institute has been established with a noble aim and vision to produce professionals of the highest caliber and values for industry and society.

ABOUT THE CONFERENCE

Amritsar Group of Colleges (AGC Amritsar), proudly announcing National Conference on "Science Technology Engineering and Management" (STEM-2024) on March 22-23, 2024. The aim of the conference is related to the sustainable goals in Science, Technology, Engineering, and Management (STEM). These goals and targets include the 2030 Agenda for Sustainable Development Goals (SDGs), The focus is to target papers related to innovation in industries with science and technology (SDG 9). The sustainable manufacturing processes, re-manufacturing, induction of IoT, Artificial Intelligence and Machine Learning in Industry. This encompasses enhancing regional and international cooperation on science, technology, and innovation; strengthening the means of implementation, and revitalizing global partnerships for sustainable development. The conference also seeks to ensure access to affordable, reliable, sustainable, and modern energy for all while promoting sustained, inclusive, sustainable buildings and clean energy (SDG 07).

Objectives

- Implementation of Sustainable processes in Industry and infrastructures.
- Role of Experts systems via. Machine learning, Artificial Intelligence in industry.
- Recent technological trends in Computer Science and Electronics Engineering in-line with various engineering applications.
- Role of SDGs in Industry for economic growth.

CALL FOR PAPERS

We invite high quality submissions describing original and unpublished results of theoretical, empirical, conceptual, and experimental work in the following themes (but not limited to)

THEMES / SUBTHEMES

Sustainable and Advanced Remanufacturing Processes

- Joining Processes: Casting, welding, Brazing, Soldering etc.
- Assessing affordability-based design methodologies that consider environmental factors for advanced manufacturing;
- Implementing design for remanufacturing, recycling and recovery.
- Methods for assessing sustainability in manufacturing (e.g. life cycle assessment, material flow analysis, carbon footprint of manufacturing processes) and their impact on plant performance.
- Materials/energy/resource utilisation factors, waste minimisation/management
- Use of new sustainable materials in processes (e.g. bio-lubricants) and their impact on environment and plant performance.
- Case studies and comparison of manufacturing processes based on their sustainability.
- Implementing real-time energy efficiency assessment of components and systems;
- Optimizing the design and advanced manufacturing processes for optimizing energy and material's efficiency;
- Optimizing process technologies for transforming scrap into reusable raw materials;
- Optimizing process planning and process scheduling for advanced manufacturing, especially in the context of low fossil-carbon and sustainability dimensions;
- Optimizing manufacturing systems under multiple sustainability criteria, such as economic feasibility, fossil-carbon emissions, and energy consumption;
- Monitoring and reducing the fossil-carbon energy footprints in advanced manufacturing process planning and production scheduling.

Sustainable Products and Development

- The influence of sustainable product innovation
- Sustainable innovation practices in new product development and role in supply chains.
- Sustainability performance evaluation for NPD and supply chains.
- Sustainable product/service design framework, technologies, and case studies.
- Data-driven new sustainable product development.
- Failure mode and effect analysis in sustainable product development.
- Decision making in managing innovation and sustainability in new product development.
- Human-centric product/service design technologies, and case studies.

Sustainable Cities and Society

- Resilient environments and smart cities.
- Green and energy-efficient structures and communities.
- Mitigation and adaptation to climate change in urban settings.
- Green building practises and BMPs.
- Management and accounting of environmental footprints.
- Urban forestry and agriculture
- Intelligent infrastructure, the smart grid, and ICT.
- Urban planning and design, rules, laws, accreditation, economics, and policy.
- The resilience and social effects of cities.
- Behaviour analysis, change, and observation in urban areas.
- Monitoring and enhancing one's health.
- Converging concerns for sustainable cities and society.
- Trade-off and uncertainty analysis decision support systems for better management of cities and society.
- Case studies and applications of big data, machine learning, and artificial intelligence.
- Urban water management and water distribution, harvesting, purification, and reuse.
- Recycling and waste reduction.
- Collection, treatment, and recycling of wastewater.
- Transportation infrastructure and systems that are intelligent, clean, and healthy.

Modeling, Analysis and Optimization of Manufacturing Processes

- Computing in Applied Mechanics
- CAD/CAM/CIM/HVAC/CAE and Product Design
- Dynamics and Control of Structures/ Systems
- Fracture and Failure Mechanics
- Solid Mechanics: Differential / Dynamical systems
- Modeling and Simulation
- Artificial Intelligence: Fuzzy Logic, Neural Network, Genetic Algorithm etc.
- Finite Element Analysis
- Advanced Numerical Techniques
- Advancements in Tribology
- Nanomechanics and MEMS
- Modeling, Analysis and Simulation of Manufacturing Processes
- Multi-objective optimization
- Applications of mathematical modeling and optimization theory and methods in various areas
- Process monitoring and control

Sustainable Cities and Society

- Smart grid technology
- Advanced manufacturing processes for electrical components
- Innovation in power distribution and transmission
- Infrastructure for sustainable energy production
- Smart city solutions involving electric grids and infrastructure
- Development of sustainable electrical systems for buildings and communities
- Integration of electric transport into urban environments
- Resilient and sustainable energy supply for urban areas

Sustainable, Affordable, and Clean Energy

- Biofuels and bioenergy
- Coal energy
- Carbon capture, storage, and utilization
- Decarbonization of energy systems
- Energy from waste
- Flexible generation and storage of Energy
- Energy efficiency
- Environmental impacts of smart technologies
- Environmental impacts of energy sources
- Non-Conventional Energy
- Energy transition
- Gas energy
- Geothermal energy
- Greenhouse gas removal
- Nuclear energy
- Oil shale energy
- Petroleum and processing industry
- Smart technologies in energy applications
- Solar energy
- Wind energy

Good Health, Well-Being, and Sustainability

- Digital Health
- Personalized Medicine
- Prevention and Early Intervention
- Environmental Health
- Global Health Security
- Mental Health
- Health Equity
- Development of Quality Pharmaceuticals
- Formulation and development
- Drug design and discovery
- Pharmacology and toxicology
- Quality control and assurance
- Complementary and alternative medicines
- Sustainable healthcare practices
- Personalized medicine
- Health and nutritions

PUBLICATIONS

After peer reviewing selected papers will be published in conference book proceeding (with ISBN No.) and high quality research papers will be sent for publication to our publication partners in reputed international journals (indexed in SCOPUS, Google Scholar)

SUBMISSION GUIDELINES

- The Cover Page Should Contain the Title, Author Name, Affiliation Address and Email Id.
- The length of the paper should not exceed 5000 words excluding Title page and References. It must be accompanied by an abstract/ summary (not exceeding 300 words) followed by 4-5 keywords.
- Paper Should be single column docs file (docs format).
- It should be typed in Roman New Style, as per following format;

Paper Title: 14 points, capitals, bold, centred

Author Names(s): 12 points, title case, centred (Corresponding author shall be indicated by superscript* after the name)

Affiliation: 10 points, centre

Abstract: 12 points, *italics*, justified.

Text: **Heading** 12 points, Title case, Bold, left aligned

Body Text 12 points justified

Figure and tables: Centred

Figure Caption & Table Tittles: 12 points, bold, centred.

References: As per APA Style (Singh, G., Vasudev, H., Bansal, A., & Vardhan, S. (2020). Microwave cladding of Inconel-625 on mild steel substrate for corrosion protection. *Materials Research Express*, 7(2), 026512.).

ABSTRACT

This study focuses the current practices related to various waste management initiatives taken for human being. The objective of study is to do a comparative analysis of performance indicators to evaluate the waste management system. This study looked the different pathways of contamination and risk associated choose the remedial options. The focus is at the ways to strengthen the existing level of attenuation through remedial measures. The study of manuscript is concerned with the major aspect like hazard identification of compounds, reference doses or daily intake levels for non- carcinogens and carcinogens. Exposure route characterization of human exposure points are of main concern. The methodology used for the study covers quantitative and qualitative approach. The study is to look at effective strategies and measures at local and global levels to save nature for our survival and sustainable development. The main thrust is prevention, minimization, reuse, recycling, recovery and the safe disposal of the waste generated. Responses to risk assessment will cover aspects like Hazard identification, Data collection, Toxicity assessment, Dose behavior response, Exposure assessment and Risk characterization.

Keywords: Hazard Index, Deterministic Approach, Bioaugmentation, Potential Carcinogens, Engineering Microbes, Plume

INTRODUCTION

Waste production is directly related to human activities [1] The number and variety of waste grows every day. In addition to municipal waste, the second group consists of industrial waste [2]. Problems related to waste management may include, negative impacts on the biosphere, water, soil and air pollution [3] Each decision made regarding the disposal of waste has an impact on where the waste will go and whether it is possible to subject it to the recycling process. That is why it is important to properly implement measures related to the waste management sector in places where they are generated [4].

Besides contaminating surface water another devastating effect of dumping site is on the groundwater through the formation of leachate [4,5]. Leachate is a liquid that leaches from a landfill /dump [6,7] It varies in composition along with its age [8]. Municipal solid waste leachate contains a large microbial population and may be heavily contaminated with pathogenic microorganisms. [9-10]. The most typical detrimental effect of leachate discharge into the environment is groundwater pollution. Leachate by seepage and infiltration not only deteriorates soil quality but also renders the associated aquifer unreliable and unfit for drinking water [7] Discharge of raw municipal leachate into streams impact aquatic life and causes degradation of water quality [11,12] India being slowly transitioning from an agricultural economy towards an industrial economy. The more and more industrial clusters are in proximity of human cluster or densely populated areas like Ghaziabad, the major industry involved in the production of fans releases considerable heavy metals into the subsurface. Due to greater contamination at the site, there was an outcry then the relevant regulatory authorities looked at the relevant aspects and they noticed that heavy metal concentrations were remarkably high, specifically for chromium. The study here is the case of a landfill in the US, that was typically used for municipal solid waste and some industrial waste. The heavy metals are leaching from the landfill into the relevant, groundwater and surface water stream.

National Conference on

Science Technology Engineering & Management

(STEM-2024)

22 - 23 March, 2023

Organized by

Department of Mechanical & Civil Engineering

- Green and energy-efficient structures and communities.
- Mitigation and adaptation to climate change in urban settings.
- Green building practises and BMPs.
- Management and accounting of environmental footprints.
- Urban forestry and agriculture
- Intelligent infrastructure, the smart grid, and ICT.
- Urban planning and design, rules, laws, accreditation, economics, and policy.
- The resilience and social effects of cities.
- Behaviour analysis, change, and observation in urban areas.
- Monitoring and enhancing one's health.
- Converging concerns for sustainable cities and society.
- Trade-off and uncertainty analysis decision support systems for better management of cities and society.
- Case studies and applications of big data, machine learning, and artificial intelligence.
- Critical infrastructure protection, encompassing difficulties with cyber-physical system stability, security, privacy, and forensics.
- Urban water management and water distribution, harvesting, purification, and reuse.
- Recycling and waste reduction.
- Collection, treatment, and recycling of wastewater.
- Transportation infrastructure and systems that are intelligent, clean, and healthy.

Modeling, Analysis and Optimization of Manufacturing Processes

- Computing in Applied Mechanics
- CAD/CAM/CIM/HVAC/CAE and Product Design
- Dynamics and Control of Structures/ Systems
- Fracture and Failure Mechanics
- Solid Mechanics: Differential / Dynamical systems
- Modeling and Simulation
- Artificial Intelligence: Fuzzy Logic, Neural Network, Genetic Algorithm etc.
- Finite Element Analysis
- Advanced Numerical Techniques
- Advancements in Tribology
- Nanomechanics and MEMS
- Modeling, Analysis and Simulation of Manufacturing Processes
- Multi-objective optimization
- Applications of mathematical modeling and optimization theory and methods in various areas
- Process monitoring and control

Sustainable Cities and Society

- Smart grid technology
- Advanced manufacturing processes for electrical components
- Innovation in power distribution and transmission
- Infrastructure for sustainable energy production
- Smart city solutions involving electric grids and infrastructure
- Development of sustainable electrical systems for buildings and communities
- Integration of electric transport into urban environments
- Resilient and sustainable energy supply for urban areas

Sustainable, Affordable, and Clean Energy

- Biofuels and bioenergy
- Coal energy
- Carbon capture, storage, and utilization
- Decarbonization of energy systems
- Energy from waste
- Flexible generation and storage of Energy
- Energy efficiency
- Environmental impacts of smart technologies
- Environmental impacts of energy sources
- Non-Conventional Energy
- Energy transition
- Gas energy
- Geothermal energy
- Greenhouse gas removal
- Nuclear energy
- Oil shale energy
- Petroleum and processing industry
- Smart technologies in energy applications
- Solar energy
- Wind energy

Good Health, Well-Being, and Sustainability

- Digital Health
- Personalized Medicine
- Prevention and Early Intervention
- Environmental Health
- Global Health Security
- Mental Health
- Health Equity
- Development of Quality Pharmaceuticals
- Formulation and development
- Drug design and discovery
- Pharmacology and toxicology
- Quality control and assurance
- Complementary and alternative medicines
- Sustainable healthcare practises
- Personalized medicine
- Health and nutritions

COMMUNICATION SKILLS' SIGNIFICANCE FOR ENGINEERS

Varun Mehra

Assistant Professor, Department of Applied Sciences, Amritsar Group of Colleges, Amritsar

Corresponding Author: Email ID: mehravarun18@gmail.com

ABSTRACT

Global human society's expansion and civilization progress are closely linked to the broad field of engineering. The process of communicating thoughts, feelings, desires, actions, etc. with one another in order to achieve a certain goal in life, either individually or in groups, is known as communication. It is a system that has been devised and put into place. The communication system is the only tool used in all sectors related to the growth, development, and transmission of knowledge. Similar to the fields of medicine, the arts, and science, engineering tools greatly contribute to the advancement and development of a nation's civilization. The method of communication, whether it is in English or another language, is the only way that engineering knowledge is conceptualized and developed. Teaching English to engineers may be a sensitive and challenging subject in terms of content, approaches, and strategies, and figuring out which are appropriate for this specific field of engineering and English. The goal is to become proficient in professional and relevant communication skills, with an emphasis on using English as a tool and sort of mediator to help shape the next generation of engineers. Without language skills, especially in English, to provide a common platform for exchanging research and ideas, we are unable to envisage Engineering Paradigm. If people do not comprehend the goal of a designed solution, it will not have a significant influence. To make sure their concepts are understood, engineers should be as explicit as they can be [1]. In order to compete in the modern technical world, an engineer must maintain both his technical and communication skills in order to compete. This article aims to assess the current state of the technical world, as well as the function and significance of communication in it.

Keywords: Communication, skill development, education, professional importance, development of civilization, communication System, engineering knowledge, engineering paradigm, linguistic **proficiency**.

INTRODUCTION

Education is widely acknowledged as a crucial tool for promoting sustainable development. In order to bring about the necessary transformation in the attitudes, behaviors, and ways of thinking of both individuals and organizations, it is necessary to make sustainability a primary focus of all forms of education. For an extended period, the general public has been exposed to a stereotype of the working engineer. This individual creates odd graphs and computations while spending 10 hours a day in front of his computer. However, he starts talking, saying he has a lot of stuff to do and that he is trying to get away as quickly as possible. This image might be a bit over the top, but that's how television and the media portray it. The demands of industry are directly impacted by globalization; a global engineer must be able to easily navigate national and cultural boundaries. This has a direct bearing on engineering education. In this context, professional engineers surely need exceptional and effective communication skills. There is a rising expectation that academic institutions will directly address industry norms and produce globally qualified engineers with non-technical abilities like communication. Many engineering faculties at universities overlook the necessity of offering these courses. Due of their lack of confidence and weak communication skills, many Indian engineering graduates are reported to be unemployed.

Among today's youth, engineering is one of the most profitable job options. A person's career trajectory is determined by their professional communication and associated skills. This is the case since most of the time in the professional world, professionals communicate. These days, students can acquire their ideal careers through efficient English communication. Transmitting a message with significance and comprehension is communication's main goal. Order, motivation, counsel, suggestion, education, negotiation, and persuasion are the primary objectives of communication. Engineering professionals' tools, such as conferences, seminars,

recipient on the other end. This is the reason that effective communication is seen as the key to disseminating knowledge. Effective communication is essential for managers to fulfill interpersonal, informational, and decision-making tasks. This is something that all professionals should always have with them. One can shape the environment to fully utilize its potential by preserving an open and efficient channel of communication both inside and outside the company.

IMPLICATIONS ON COMMUNICATION AT WORK

There will always be difficulties while speaking with coworkers, even if you are well-prepared and have excellent communication skills. Numerous factors may be at play, including the coworkers' varying backgrounds, accents, organizational cultures, closed groups, direct versus indirect feedback, personality qualities, and disparities in experience, in addition to the grapevine's function. A competent engineer is expected to manage the problems that arise from time to time while carrying out their professional duties, in addition to maintaining focus on their objective. [11] A person's ability to manage various situations stems from their comprehension, which is derived from their refined and advanced communication abilities. An engineer's job at work involves handling these obstacles, which are not little matters to be undertaken lightly. Effective technical information transfer through chats, discussions, or publications is more important than ever in today's professional environment. In addition to showcasing the expertise and accomplishments of scientists, engineers, and other professionals, these kinds of communication serve as the public face of the organizations, representing its accomplishments and policies. Since a significant portion of the global scientific, engineering, and technical community communicates in English, improving one's listening, speaking, reading, and writing (LSRW) skills in the language is now crucial for professionals and students involved in technological development. [6]

WORKFORCE AND WORKABILITY

A postgraduate in our nation is having trouble finishing a loan application or deriving a meaningful meaning from an English news paper's editorial in this global period where proficiency in the language is crucial. Being able to communicate and comprehend in English, which is now the local language of the world, is not important in this context. It is a harsh reality that someone is illiterate in this day and age if they cannot use a computer or speak English. It is important that we comprehend the meaning of "Employment and Employability" in this context.

Work, or occupation, is what one is engaged in and is of a transient nature. However, employability is a personal, self-sufficient skill that helps people find, keep, and thrive in their jobs, enabling them to take control of their own lives. The situation is the same if I discuss the engineering profession. Knowledge in a certain field comes after literacy in communication skills and personality. Communication skills are very important during the selection process and are required even if the job is allowed to continue. [9]

CONCLUSION

Though it's not entirely accurate, some people may believe that engineers work with a lot of figures and sketches. Given the material above, it is abundantly evident how crucial it is to have strong English communication abilities. The days when professional medics or engineers gave this subject little weight are long gone, as communication skills are now taught in all colleges, universities, and teaching-learning centers as a necessary subject for study, practice, and training. The idea of a language lab in engineering and other academic institutions would have never occurred to anyone, but as we can see, it is now one of the prerequisites for many accreditations that are granted to the institutes.

Initially, engineering may seem like a better option than writing or rhetoric, but these skills are actually essential to engineering. Proficiency in writing is highly advantageous for engineers and has the potential to distinguish one engineer from another. Many engineers wish they had known some basics about writing and rhetoric before they began their careers, especially as aspiring engineers. [7] Therefore, effective communication plays a crucial role in every aspect of a person's life, whether they are professionals in engineering or not.

KNOWLEDGE AND INNOVATION MANAGEMENT IN HIGHER EDUCATION

Pooja Puri

Professor & Head, Department of Management Studies, Amritsar Group of Colleges, ASR

Corresponding Author: Email ID: poojapuri2530@gmail.com

ABSTRACT

This is the study about the universities and institutions of higher education and their role in knowledge management and innovation management. Every higher education institution is situated with the service to make society progressive. Knowledge Management helps the higher education institutions to improve their capacity of gathering and sharing the knowledge in the best way. Innovation is the process which helps the higher education institutes by creating new ideas, methods and devices. In past the higher education system had many difficulties but now it has progressed well.

Keywords: Knowledge, Innovation, Education Institutes, New Ideas, Progressive, Methods.

INTRODUCTION

Knowledge management is the process of acquiring, sharing and effectively using knowledge. Knowledge management includes courses taught in the field of business administration, information system, management, library, and information science (Michael E.D. Koenig). Knowledge Management is important for universities as well as organizations. The knowledge Management is hastily being popular in the field of education. It has ability and is very representative in the field of education. The higher education (HE) sector is facing many challenges from the rapid technological change and the increasing demands of today's world. Academic institutions need to develop their abilities and respond to these challenges and demands like business organizations [16].

Innovation Management-: In common parlance, the term innovation refers to the introduction of a new idea, method, or device. From a management perspective, Peter Drucker suggested that innovation is a "change that creates a new dimension of performance". Innovation is the successful exploitation of

Knowledge and Innovation Management in Higher Education-: Universities and colleges are the oldest education institutions. Their main work is to inculcate education and research. Apart these now a day service to the community and research valorization are the other works being done by these education institutions. Recently information society is being transformed into a knowledge society. (Kari Laine)

Higher education institutions are traditionally seen as producers of new, knowledge and technology. Today they are more and more supposed to be platforms of co-created innovations and improvements in society. This is a challenge for all higher education institutions. The creation of technological, economic and social innovation requires new types of actions and collaboration from institutions of higher education as well as from their management, teachers and researchers. Co-creation of innovations is both the process and outcome. It requires innovation and application in context. (Matti Labdeniemi, et.al). Higher education continues to evolve worldwide. Higher education is evolving and improving to meet the challenges of the contemporary landscape. These require closer examination of quality, novel uses of technology, ways to reach learners with disabilities, and particular innovations (Susan C. White, et. al).

Higher education's value proposition has many components. The actual effectiveness of the educational experience is of course a key component, but other aspects such as location and academic focus, emphasis on traditional students or adult learners, price, and breadth of student activities provide variations that appeal to different student demographics.. In fact, higher education has in general strongly opposed efforts to create such measures. As a consequence, the educational component of higher education is often used by economists as an

National Conference on Science Technology Engineering & Management

(STEM 2024)

March 22 - 23, 2024

Best Paper Presentation Certificate

Ref. No. AGC/DORD / 2024 / 24

This is to certify that Prof./Dr./Mr./Ms. HARDEEP SINGH from AMRITSAR GROUP OF COLLEGES has been awarded as Best Paper Presenter

for the paper titled EMPOWERING TOMORROW'S INNOVATORS : A COMPREHENSIVE EXPLORATION
OF SKILL - BASED ENTERPRENERSHIP IN MODERN BUSINESS LANDSCAPE
in the "National Conference on Science Technology Engineering and Management (STEM 2024)" held at

Amritsar Group of Colleges, Amritsar during March 22-23, 2024

Dr. Gurbhraj Singh
Conference Secretary

Dr. Narinder Sharma
Dean (Research & Development)

Dr. Upain Bhatia
Dean Academic Affairs

Dr. Gaurav Tejpal
Principal

National Conference on Science Technology Engineering & Management

(STEM-2024)

March 22 - 23, 2024

Certificate of Participation / Presentation

Ref. No. AGC / DORD / 2024 / 88

This is to certify that Prof./Dr./Mr./Ms. Dr. HAROEEP SINGH from
Department of Management Studies, Amritsar Group of Colleges, Amritsar has Participated/Presented
the paper titled Empowering Tomorrow's Innovators: A Comprehensive Exploration of Skill -
based Entrepreneurship in the Modern Business Landscape.

in the "National Conference on Science Technology Engineering and Management (STEM 2024)" held at
Amritsar Group of Colleges, Amritsar during March 22-23, 2024

Science Technology Engineering & Management

(STEM-2024)

22 - 23 March, 2023

Organized by

Department of Mechanical & Civil Engineering

AS
06 May 2024

- Green and energy-efficient structures and communities.
- Mitigation and adaptation to climate change in urban settings.
- Green building practises and BMPs.
- Management and accounting of environmental footprints.
- Urban forestry and agriculture
- Intelligent infrastructure, the smart grid, and ICT.
- Urban planning and design, rules, laws, accreditation, economics, and policy.
- The resilience and social effects of cities.
- Behaviour analysis, change, and observation in urban areas.
- Monitoring and enhancing one's health.
- Converging concerns for sustainable cities and society.
- Trade-off and uncertainty analysis decision support systems for better management of cities and society.
- Case studies and applications of big data, machine learning, and artificial intelligence.
- Critical infrastructure protection, encompassing difficulties with cyber-physical system stability, security, privacy, and forensics.
- Urban water management and water distribution, harvesting, purification, and reuse.
- Recycling and waste reduction.
- Collection, treatment, and recycling of wastewater.
- Transportation infrastructure and systems that are intelligent, clean, and healthy.

Modeling, Analysis and Optimization of Manufacturing Processes

- Computing in Applied Mechanics
- CAD/CAM/CIM/HVAC/CAE and Product Design
- Dynamics and Control of Structures/ Systems
- Fracture and Failure Mechanics
- Solid Mechanics: Differential/ Dynamical systems
- Modeling and Simulation
- Artificial Intelligence: Fuzzy Logic, Neural Network, Genetic Algorithm etc.
- Finite Element Analysis
- Advanced Numerical Techniques
- Advancements in Tribology
- Nanomechanics and MEMS
- Modeling, Analysis and Simulation of Manufacturing Processes
- Multi-objective optimization
- Applications of mathematical modeling and optimization theory and methods in various areas
- Process monitoring and control

Sustainable Cities and Society

- Smart grid technology
- Advanced manufacturing processes for electrical components
- Innovation in power distribution and transmission
- Infrastructure for sustainable energy production
- Smart city solutions involving electric grids and infrastructure
- Development of sustainable electrical systems for buildings and communities
- Integration of electric transport into urban environments
- Resilient and sustainable energy supply for urban areas

Sustainable, Affordable, and Clean Energy

- Biofuels and bioenergy
- Coal energy
- Carbon capture, storage, and utilization
- Decarbonization of energy systems
- Energy from waste
- Flexible generation and storage of Energy
- Energy efficiency
- Environmental impacts of smart technologies
- Environmental impacts of energy sources
- Non-Conventional Energy
- Energy transition
- Gas energy
- Geothermal energy
- Greenhouse gas removal
- Nuclear energy
- Oil shale energy
- Petroleum and processing industry
- Smart technologies in energy applications
- Solar energy
- Wind energy

Good Health, Well-Being, and Sustainability

- Digital Health
- Personalized Medicine
- Prevention and Early Intervention
- Environmental Health
- Global Health Security
- Mental Health
- Health Equity
- Development of Quality Pharmaceuticals
- Formulation and development
- Drug design and discovery
- Pharmacology and toxicology
- Quality control and assurance
- Complementary and alternative medicines
- Sustainable healthcare practices
- Personalized medicine
- Health and nutritions

**EMPOWERING TOMORROW'S INNOVATORS:
A COMPREHENSIVE EXPLORATION OF SKILL-BASED
ENTREPRENEURSHIP IN THE MODERN BUSINESS
LANDSCAPE**

Dr. Hardeep Singh

Professor, Amritsar Group of Colleges (Autonomous)
Amritsar (Punjab) India
dr.hardeepsinghsodhi@gmail.com

Abstract

In an era characterized by rapid technological advancements and dynamic market landscapes, the role of entrepreneurs has evolved beyond traditional business models. This paper, titled "Empowering Tomorrow's Innovators: A Comprehensive Exploration of Skill-Based Entrepreneurship in the Modern Business Landscape," delves into the paradigm shift towards skill-based entrepreneurship and its pivotal role in shaping the future of business. The abstract begins by highlighting the unprecedented pace of change in the business world, emphasizing the need for a new breed of entrepreneurs equipped with diverse and specialized skill sets. It explores the concept of skill-based entrepreneurship as a catalyst for innovation and adaptation in an increasingly competitive global economy. The paper navigates through case studies, industry analyses, and success stories, examining how entrepreneurs leverage their unique skills to identify opportunities, overcome challenges, and create sustainable ventures. It sheds light on the symbiotic relationship between individual skill development and entrepreneurial success, emphasizing the importance of continuous learning and adaptability. Furthermore, the abstract discusses the implications of skill-based entrepreneurship on economic growth, job creation, and societal advancement. It addresses the role of education, mentorship, and support systems in nurturing the skills essential for entrepreneurial endeavors. As the business landscape continues to evolve, this paper provides valuable insights into the significance of skill-based entrepreneurship as a driving force for innovation and economic development. It aims to inspire and guide aspiring entrepreneurs, policymakers, and educators towards fostering a culture that empowers individuals to harness their unique skills for creating a sustainable and prosperous future.

Key Words: *Economic Growth, Entrepreneurship, Innovation, Sustainable Ventures, Skill-based Entrepreneurship, Technological Advancements.*

Introduction:

Skill-based entrepreneurship in modern business is a dynamic and adaptive approach that emphasizes leveraging individual skills, expertise, and talents to thrive in today's rapidly evolving economic landscape. In the contemporary business environment, characterized by technological advancements, globalization, and changing consumer preferences, skill-based entrepreneurship offers a personalized and agile way for individuals to establish and grow successful ventures. Modern businesses heavily rely on technology, and skill-based entrepreneurs are often at the forefront of adopting and adapting to

COLLEGE PROFILE

Amritsar Group of Colleges (AGC) was established by Amritsar International Education Trust in 2002. This premier institute has been duly approved by AICTE/PCI. AGC with its magnificent environment and superior learning system is ranked among the best colleges in North India. AGC is affiliated with Punjab Technical University, Kapurthala, and accredited by the National Board of Accreditation (2009-12 & 2016-18) and the National Assessment & Accreditation Council (NAAC) with Grade 'A'. AGC became the first private Autonomous Engineering College in Punjab on 19 June 2014. Its tremendous growth in a short period explicates its success in the education sector. The institute endeavors to educate the human beings who contribute towards the welfare of the society and raise the quality of life of its people. The Institute has been established with a noble aim and vision to produce professionals of the highest caliber and values for industry and society.

DEPARTMENTAL INSIGHT

The Department of Management Studies is one of the elite departments of AGC, functioning since 2004, working on the postulates of 5 Es-Education, Enhancement & Employment. The Department offers Postgraduate Programme: Master of Business Administration and two Undergraduate Programmes: B.Com (Honours) & Bachelor of Business Administration. It shares the vision and mission of the institute imparting high-quality education to the students. The Department is equipped with well-qualified and experienced faculty to enhance the students managerial skill and professional attitudes that enable them to face the challenges in their professional career.

TECHNICAL COMMITTEE FROM AGC AMRITSAR

- Dr. Upain Kumar Ibrathia, Dean Academic Affairs
- Dr. Sanjay Sharma, Dean Pharmacy
- Dr. Sandeep Kaur, Professor & Head-CSE
- Dr. Navdeep Singh, Deputy Dean (R&D)
- Dr. Namrata Kaur, Professor & Head-EE
- Dr. Saurabh Sehajpal, Professor & Head Pharmacy
- Dr. Sachin Khurana, Associate Professor & Head-DCA
- Dr. Gurbhraj Singh, AP

ADVISORY COMMITTEE

- Dr. Sanjay Bahi, Vice Chancellor, Indus International University, Una (Himachal Pradesh)
- Prof. Sanjay Kaushik, Honorary Director ICSSR, PU, Chandigarh
- Dr. Rajender Kumar Uppal, Principal, Baba Fand College of Management and Technology, Bathinda (Punjab)
- Dr. Nishi Bala, Principal, Luthiana Group of Colleges, Luthiana (Punjab)
- Dr. P.S. Parra, Professor & Registrar, AGC, Amritsar (Punjab)
- Dr. Manoj Kumar, Registrar (Finance), AGC, Amritsar (Punjab)
- Dr. Suresh Kumar Dhameja, Professor and Head, Department of Entrepreneurship Dev. and Industrial Coordination, NITRR, Chandigarh

- Dr. B.B. Goyal, Professor, University Business School, Punjab University, Chandigarh
- Dr. Harmeen Soth, Professor and Head, Department of Management, I.K. Gujral Punjab Technical University, Kapurthala, (Punjab)
- Dr. Yogita Sharma, Professor, Manav Rachna University, Faridkot
- Dr. Pavleen Sandhu, Associate Professor, UBS, GNDU, Amritsar (Punjab)
- Dr. Vikram Sandhu, Associate Professor, UBS, GNDU, Amritsar (Punjab)
- Dr. Harmandeep Kaur, Associate Professor, University School of Financial Studies, GNDU, Amritsar (Punjab)
- Dr. Suman Nayyar, Head PG Department of Commerce & Management, Khalsa College for Women, Amritsar (Punjab)
- Dr. Pamy Bansal, Associate Professor & Head, PG Department of Commerce, SSD Girls College, Bathinda (Punjab)
- Dr. Swaraj Kaur, Associate Professor, Khalsa College, Amritsar (Punjab)
- Dr. Amarjeet Singh, Dean Academics, Pyramid College of Business and Technology, Phagwara (Punjab)
- Dr. Maninder Singh Gill, Associate Professor, Department of Management Studies, Chandigarh Group of Colleges, Landran, Mohali (Punjab)
- Dr. Gursimranjit Singh, IIM, Amritsar, (Punjab)

CHIEF PATRON (S)

- Dr. Amit Sharma, Chairman & CEO, Group of Colleges, Amritsar
- Dr. Jagini Sharma, Professor of Finance

PATRON (S)

- Dr. Neesh Arora, Managing Director
- Dr. Navdeep Tejpal, Professor

ORGANIZING SECRETARIES

- Dr. Rinder Sharma, Research & Development
- Dr. Oja Puri, Assistant Head

PROGRAM CONVENER

- Dr. Navdeep Singh, Assistant Professor, Department of Management Studies

ABOUT ICSSR

Council of Social Science Research (ICSSR) was established in 1969 by Government of India to promote research in social sciences in the country. ICSSR provide grants for projects, fellowships, international orientation, capacity building, survey, publications etc. to promote research in Social Sciences in India. Documentation center of ICSSR and Social Science Documentation Centre (NASSDOC) - provides research and information support services to researchers in social sciences in Social Sciences in India. ICSSR has developed ICSSR Data base for promoting a powerful research environment through sharing and of data among the social science community in India.

SEMINAR OVERVIEW

Sustainable Development Goals (SDGs) or Global Goals are a set of 17 global goals designed to serve as a blueprint for peace and prosperity for people and the planet, now into the future. The SDGs emphasize the interconnected environmental, social and economic aspects of sustainable development by global sustainability at their center. The Sustainable Development Goals are a uniquely ambitious and comprehensive agenda for global development by 2030. In the context of sustainable development goals for lasting future development, Amritsar Group of Colleges, Amritsar, Punjab proposes to organize a two-days National Seminar on "SUSTAINABLE DEVELOPMENT GOALS (SDGs): AN ERA FOR LONG LASTING DEVELOPMENT", so as to provide a forum to the academicians, researchers and policy makers to deliberate on this theme of utmost importance and suggest appropriate policy solutions. The unique format of the seminar will not only request the researchers/students to submit papers but also to define all the possible challenges and contemporary issues, form an solutions and develop an effective action plan for the sustainable growth. The seminar aims to explore the principles, benefits, potential of SDGs in fostering environmental, economic, and social sustainability. Through presentations, discussions, and practical demonstrations, participants will gain insights into the advantages of sustainable development goals. The seminar will also shed light on the viable viability of SDGs. By addressing key challenges and showcasing successful case studies and research papers, the seminar will provide a platform for knowledge exchange, collaboration, and the promotion of sustainable solutions for achieving long-term development objectives for the sustainable development of the Nation.

CALL FOR PAPERS

Students are invited from Practitioners, Academicians, Research Scholars and students on the theme of Sustainable Development Goals. Authors can submit their research papers/manuscripts on any of the below-mentioned

MAJOR THEMES

- Sustainable Energy
- Digital Infrastructure
- Sustainable Development
- Gender and Development: Relationship
- Index of Gender Development Index (GDI)
- and Global Development

- Women, Gender and Development
- Energy for Sustainable Development
- Renewable Energy and Sustainable Development
- Sustainable Energy Technologies
- Responsible Consumption and Production
- Inclusive Growth and Sustainable Development
- Inclusive Growth and Sustainable Development: Indian Perspective
- Inclusive Growth Index
- Climate Change and Economic Development
- Green Human Resources Management (GHRM)
- Green Marketing and Green Banking
- Green Inclusive Leadership
- Green Financial Services
- Environment and Sustainable Development
- Health, Environment and Sustainable Development
- Happy Planet Index
- Finance and Development
- Development Finance
- Public Finance and Development
- Finance Development Programme
- Climate Finance and Development

Note: The sub-themes are just indicative and not exhaustive. Any other sub-themes related to the topic can be considered.

All submitted Research Papers / manuscripts will undergo a peer review process to ensure a high-quality standard. Prospective and interested authors can submit a full Research Paper / manuscript of the proposed work relevant to the theme(s) of the seminar before the deadline

IMPORTANT DATES

Last Date for Abstract	28 th March 2024
Notification for Acceptance	07 th April 2024
Last Date for the full Paper	08 th April 2024

Papers received by 08th April 2024 will be considered for publication in the edited book with ISBN.

Send Papers on Email: sdg2024@acet.edu.in

REGISTRATION FEE

For Professionals, Academicians, and Research Scholars	Rs. 500/-
For Students	Rs. 300/-

All the authors are required to pay registration fee individually. Participants have to pay an additional amount of Rs. 700/- for hard Copy of their publication with ISBN.

Registration link for Seminar:

<https://agcmritsar.in/sustainable-development-seminar>

Guidelines for Paper Submission:

- Abstract should not be more than 300 words.
- The paper should include four subsections: Topic, abstract, main body, and references.
- The details of the Author(s) include the Name, Designation, Affiliation, email, and contact number of all the authors (All authors will have to register separately).
- Length of the paper should be 2500-3000 words.
- The paper should be typed in MS-WORD, 12 font size (heading 14 sizes), Times New Roman font style, 1.5 spacing
- The references should be written according to the APA style.
- The paper should be checked for plagiarism.
- Tables and figures should be indicated by numbers separately (Table 1, Fig 1).
- Maximum Authors allowed per paper-3 (all Authors will have to register separately).
- Paper Presentation Certificates shall be provided to all the Registered Author(s) of the accepted papers.
- No TA/DA will be given to the out-station participants.
- The abstract and paper should be sent at sdg2024@acet.edu.in
- Participants have to pay an additional amount of Rs. 700/- for hard copy of their publication with ISBN.

Harmonizing Lives for Sustainable Development: The Integral Role of Work-Life-Balance in Achieving the SDGs

Dr. Hardeep Singh

*Professor, Department of Management Studies
Amritsar Group of Colleges, Amritsar (Punjab) India*

Abstract

In the pursuit of sustainable development, the global community has embraced the Sustainable Development Goals (SDGs) as a blueprint for a better and more sustainable future for all. Amidst the multifaceted challenges encompassed by the SDGs, achieving a harmonious work-life-balance emerges as a pivotal yet often overlooked factor. This paper delves into the intricate interplay between work-life-balance and the attainment of the SDGs, offering a comprehensive analysis of its significance across various dimensions. Drawing upon interdisciplinary literature, this paper elucidates how fostering work-life-balance contributes to the advancement of key SDGs, including but not limited to Goal 1 (No Poverty), Goal 3 (Good Health and Well-being), Goal 5 (Gender Equality), Goal 8 (Decent Work and Economic Growth), and Goal 10 (Reduced Inequalities). It underscores the profound impact of work-life-balance on individual well-being, social equity, economic productivity, and environmental sustainability, thereby serving as a linchpin for sustainable development at large. Moreover, this paper explores the challenges hindering the realization of work-life-balance at both individual and organizational levels, encompassing issues such as overwork culture, gender disparities, inadequate social support systems, and technological disruptions. It advocates for a holistic approach that integrates policy interventions, organizational practices, and societal norms to cultivate an environment conducive to work-life balance. Furthermore, the paper examines promising strategies and best practices from diverse contexts worldwide, highlighting innovative policies, flexible work arrangements, supportive workplace cultures, and technological solutions that promote work-life harmony while advancing the SDGs. It emphasizes the imperative of collaborative efforts involving governments, businesses, civil society, and individuals to mainstream work-life-balance into the broader discourse and implementation of sustainable development initiatives.

Keywords: Economic Productivity, Work-Life-Balance, SDGs, Social Equity, Sustainable Development.

Introduction

In the quest for global prosperity and well-being, the Sustainable Development Goals (SDGs) have emerged as a beacon of hope, guiding nations toward a future characterized by sustainability, equity, and resilience. Encompassing a broad spectrum of economic, social, and environmental aspirations, the SDGs underscore the interconnectedness of global challenges and the imperative of collective action. Amidst this complex landscape, the role of work-life-balance (WLB) has garnered increasing attention as a critical determinant of sustainable development outcomes. Work-life-balance refers to the equilibrium between professional responsibilities and personal

Challenges and Developments in Applications of ICT based Technologies for Education System

Ms. Ramandeep Kaur

 Faculty, Department of Management Studies

Amritsar Group of Colleges, Amritsar

Email ID: raman.delcy@gmail.com

Abstract

This paper discuss various views and conceptual frameworks put forward in the discussion of ICT and sustainable development: An optimistic and a pessimistic view of ICT with regard to sustainability, the three-pillar approach to sustainable development, the three-level approach to ICT impacts, the claim of human, social and ecological compatibility of ICT and the plain use of ICT for development. We show that each of these approaches has its problems and limitations and conclude with formulating the challenges of finding an analytical approach which will effectively support decision-makers in using ICT in the service of sustainable development. Sustainable development is the type of development that satisfies the current needs without compromising the resources needed for future generations. Although the term "sustainable development" is frequently associated with the environment, it encompasses a wide-range of factors beyond just environmentalism. In fact, the relationship between the two is so close that the term "synchronous" is more appropriate. Sustainable development operates under three key dimensions: the environment, the economy, and society. The use of ICT in the classroom is very important for providing opportunities for students to learn to operate in an information age. Studying the obstacles to the use of ICT in education may assist educators to overcome these barriers and become successful technology adopters in the future.

Keywords: Sustainable Development, Goals, Ethics, Technological Determinism, Life Cycle Assessment, Green ICT, Rebound Effect, ICT for Development.

Introduction:

Sustainable development

Sustainable development, including in the digital field, can best be achieved if actors work together and contribute their experience, expertise and resources to realising the common goals. Sustainable development refers to a pattern of economic growth and development that meets the needs of the present generation without compromising the ability of future generations to meet their own needs. It involves balancing the economic, social, and environmental aspects of development in a way that promotes long-term well-being and sustainable use of resources

Sustainable Digital Goals

A series of studies have been conducted so far on the relationship between digital technology and sustainable development. To illustrate, in 2015 the Internet Society issued a report 'The Internet and Sustainable Development' where it described the Internet as a 'critical enabler of social and economic change' and explored the link between the SDGs and the WSIS.

ABOUT ICSSR

Indian Council of Social Science Research (ICSSR) was established in 1969 by the Government of India to promote research in social sciences in the country. ICSSR provides grants for projects, fellowships, international collaboration, capacity building, survey, publications, etc. to promote research in Social Sciences in India. Documentation center of ICSSR at National Social Science Documentation Centre (NASSDOC) provides library and information support services to researchers in social sciences research in Social Sciences in India. ICSSR has developed ICSSR Data base for promoting a powerful research environment through sharing and use of data among the social-science community in India.

SEMINAR OVERVIEW

Sustainable Development Goals (SDGs) or Global Goals are a collection of seventeen interlinked objectives designed to serve as a shared blueprint for peace and prosperity for people and the planet, now and into the future. The SDGs emphasize the interconnectedness of environmental, social and economic aspects of sustainable development by setting sustainability at their center. The Sustainable Development Goals form a uniquely ambitious and comprehensive agenda for global development by 2030. In the context of sustainable development goals for lasting future development, Amritsar Group of Colleges, Amritsar, Punjab, proposes to organize a two-day National Seminar on SUSTAINABLE DEVELOPMENT GOALS (SDGs), AN ERA FOR LONG-LASTING URBAN DEVELOPMENT, so as to provide a forum to the academicians, teachers and policy makers to deliberate on this theme of utmost importance and suggest appropriate policy solutions. The unique format of the event will not only request the researchers/students to submit papers also to define all the possible challenges and contemporary issues, reform on solutions and develop an effective action plan for the sustainable growth. The seminar aims to explore the principles, benefits, potential of SDGs in fostering environmental, economic, and social sustainability through presentations, discussions, and practical orientations. Participants will gain insights into the advantages of sustainable development goals. The seminar will also shed light on the sustainable viability of SDGs. By addressing key challenges and showcasing successful case studies and research papers, the seminar will provide a platform for knowledge exchange, collaboration, and the promotion of sustainable solutions for achieving long-term development objectives for sustainable development of the Nation.

CALL FOR PAPERS

Researchers are invited from Practitioners, Academicians, and Research Scholars/Students on the theme of Sustainable Development Goals. Authors can submit their research papers/manuscripts on any of the below-mentioned themes.

MAJOR THEMES

- Sustainable Energy
- Digital Infrastructure
- Environmental Sustainability
- Urban and Development, Relationship
- Role of Gender Development Index (GDI)
- Urban and Global Development

- Women, Gender and Development
- Energy for Sustainable Development
- Renewable Energy and Sustainable Development
- Sustainable Energy Technologies
- Responsible Consumption and Production
- Inclusive Growth and Sustainable Development
- Inclusive Growth and Sustainable Development: Indian Perspective
- Inclusive Growth Index
- Climate Change and Economic Development
- Green Human Resources Management (GHRM)
- Green Marketing and Green Banking
- Green Inclusive Leadership
- Green Financial Services
- Environment and Sustainable Development
- Health, Environment and Sustainable Development
- Happy Planet Index
- Finance and Development
- Development Finance
- Public Finance and Development
- Finance Development Programme
- Climate Finance and Development

Note: The sub-themes are just indicative and not exhaustive. Any other sub-themes related to the topic can be considered.

All submitted Research Papers / manuscripts will undergo a peer review process to ensure a high-quality standard. Prospective and interested authors can submit a full Research Paper / manuscript of the proposed work relevant to the theme(s) of the seminar before the deadline.

IMPORTANT DATES

Last Date for Abstract	28 th March 2024
Notification for Acceptance	02 nd April 2024
Last Date for the Full Paper	08 th April 2024

Papers received by 08th April 2024 will be considered for publication in the edited book with ISBN.

Send Papers on Email: sdg2024@acet.edu.in

REGISTRATION FEE

For Professionals, Academicians, and Research Scholars	Rs. 500/-
For Students	Rs. 300/-

All the authors are required to pay registration fee individually. Participants have to pay an additional amount of Rs. 700/- for hard Copy of their publication with ISBN.

Registration link for Seminar:

<https://logcamritsar.in/sustainable-development-seminar>

Guidelines for Paper Submission:

- Abstract should not be more than 500 words.
- The paper should include four subsections: Topic, abstract, main body, and references.
- The details of the Author(s) include the Name, Designation, Affiliation, email, and contact number of all the authors. (All authors will have to register separately).
- Length of the paper should be 2500-3000 words.
- The paper should be typed in MS-WORD, 12 font size (heading 14 sizes), Times New Roman font style, 1.5 spacing.
- The references should be written according to the APA style.
- The paper should be checked for plagiarism.
- Tables and figures should be indicated by numbers separately (Table 1, Fig. 1).
- Maximum Authors allowed per paper-3 (all Authors will have to register separately).
- Paper Presentation Certificates shall be provided to all the Registered Authors of the accepted paper.
- No A/J/A will be given to the out-station participants.
- The abstract and paper should be sent to sdg2024@acet.edu.in
- Participants have to pay an additional amount of Rs. 700/- for hard copy of their publication with ISBN.

COLLEGE PROFILE

Amritsar Group of Colleges (AGC) was established by Amritsar International Education Trust in 2002. This premier institute has been duly approved by AICTE/PCI. AGC with its magnificent environment and superior learning system is ranked among the best colleges in North India. AGC is affiliated with Punjab Technical University, Kapurthala, and accredited by the National Board of Accreditation (2009-12 & 2016-18) and the National Assessment & Accreditation Council (NAAC) with Grade 'A'. AGC became the first private Autonomous Engineering College in Punjab on 19 June 2014. Its tremendous growth in a short period explicates its success in the education sector. The institute endeavors to educate the students to become not only competent professionals but also excellent human beings who contribute towards the welfare of the society and raise the quality of life of its people. The institute has been established with a noble aim and vision to produce professionals of the highest caliber and values for industry and society.

DEPARTMENTAL INSIGHT

The Department of Management Studies is one of the elite departments of AGC, functioning since 2004, working on the postulates of 5 Es-Education, Enhancement & Employment. The Department offers Postgraduate Programme: Master of Business Administration and two Undergraduate Programmes: B.Com (Honours) & Bachelor of Business Administration. It shares the vision and mission of the institute imparting high-quality education to the students. The Department is equipped with well-qualified and experienced faculty to enhance the students managerial skill and professional attitudes that enable them to face the challenges in their professional career.

ABOUT ICSSR

Indian Council of Social Science Research (ICSSR) was established in 1969 by the Government of India to promote research in social sciences in the Country. ICSSR provide grants for projects, fellowships, international collaboration, capacity building, survey, publications etc. to promote Research in Social Sciences in India. Documentation center of ICSSR - National Social Science Documentation Centre (NASDOC) - provides library and information support services to researchers in social sciences Research in Social Sciences in India. ICSSR has developed ICSSR Data Service for promoting a powerful research environment through sharing and reuse of data among the social science community in India.

SEMINAR OVERVIEW

The Sustainable Development Goals (SDGs) or Global Goals are a collection of seventeen interlinked objectives designed to serve as a "shared blueprint for peace and prosperity for people and the planet, now and into the future." The SDGs emphasize the interconnected environmental, social and economic aspects of sustainable development by putting sustainability at their center. The Sustainable Development Goals lay out a uniquely ambitious and comprehensive agenda for global development by 2030. In the context of sustainable development goals for long lasting future development, Amritsar Group of Colleges, Amritsar, Punjab proposes to organize a two-days National Seminar on "SUSTAINABLE DEVELOPMENT GOALS (SDGs): AN ERA FOR LONG LASTING FUTURE DEVELOPMENT", so as to provide a forum to the academicians, researchers and policy makers to deliberate on this theme of utmost importance and suggest appropriate policy solutions. The unique format of this event will not only request the researchers/students to submit papers but also to define all the possible challenges and contemporary issues, brainstorm on solutions and develop an effective action plan for the sustainable growth. The seminar aims to explore the principles, benefits, and potential of SDGs in fostering environmental, economic, and social sustainability. Through presentations, discussions, and practical demonstrations, participants will gain insights into the advantages of sustainable development goals. The seminar will also shed light on the sustainable viability of SDGs. By addressing key challenges and showcasing successful case studies and research papers, the seminar will provide a platform for knowledge exchange, collaboration, and the promotion of sustainable solution for achieving long-term development objectives for sustainable development of the Nation.

CALL FOR PAPERS

Papers are invited from Practitioners, Academicians, Research Scholars and Students on the theme of Sustainable Development Goals. Authors can submit their research papers/manuscripts on any of the below-mentioned themes.

MAJOR THEMES

- Sustainable Energy
- Financial Infrastructure
- Educational Sustainability
- Gender and Development: Relationship
- Importance of Gender Development Index (GDI)
- Gender and Global Development

- Women, Gender and Development
- Energy for Sustainable Development
- Renewable Energy and Sustainable Development
- Sustainable Energy Technologies
- Responsible Consumption and Production
- Inclusive Growth and Sustainable Development
- Inclusive Growth and Sustainable Development: Indian Perspective
- Inclusive Growth Index
- Climate Change and Economic Development
- Green Human Resources Management (GHRM)
- Green Marketing and Green Banking
- Green Inclusive Leadership
- Green Financial Services
- Environment and Sustainable Development
- Health, Environment and Sustainable Development
- Happy Planet Index
- Finance and Development
- Development Finance
- Public Finance and Development
- Finance Development Programme
- Climate Finance and Development

Note: The sub-themes are just indicative and not exhaustive. Any other sub-themes related to the topic can be considered.

All submitted Research Papers / manuscripts will undergo a peer review process to ensure a high-quality standard. Prospective and interested authors can submit a full Research Paper / manuscript of the proposed work relevant to the theme(s) of the seminar before the deadline.

IMPORTANT DATES

Last Date for Abstract	28 th March 2024
Notification for Acceptance	02 nd April 2024
Last Date for the full Paper	08 th April 2024

Papers received by 08th April 2024 will be considered for publication in the edited book with ISBN.

Send Papers on Email: sdg2024@acetedu.in

REGISTRATION FEE

For Professionals, Academicians, and Research Scholars	Rs. 500/-
For Students	Rs. 300/-

All the authors are required to pay registration fee individually. Participants have to pay an additional amount of Rs. 700/- for hard Copy of their publication with ISBN.

Registration link for Seminar:

<https://agcamritsar.in/sustainable-development-seminar>

Guidelines for Paper Submission:

- Abstract should not be more than 300 words.
- The paper should include four subsections: Topic, abstract, main body, and references.
- The details of the Author(s) include the Name, Designation, Affiliation, email, and contact number of all the authors (All authors will have to register separately).
- Length of the paper should be 2500-3000 words.
- The paper should be typed in MS-WORD, 12 font size (heading 14 sizes), Times New Roman font style, 1.5 spacing.
- The references should be written according to the APA style.
- The paper should be checked for plagiarism.
- Tables and figures should be indicated by numbers separately (Table 1, Fig. 1).
- Maximum Authors allowed per paper-3 (all Authors will have to register separately).
- Paper Presentation Certificates shall be provided to all the Registered Author(s) of the accepted papers.
- No TA/DA will be given to the out-station participants.
- The abstract and paper should be sent at sdg2024@acetedu.in
- **Participants have to pay an additional amount of Rs. 700/- for hard copy of their publication with ISBN.**

Subject: - Reimbursement of Registration Fee.

R/Sin,

I Mr. Vijay Kumar Asst. Prof. in civil Engg. department, AGC, Amritsar, want to bring a kind notice that, I had registered and submitted the research paper in the International conference on Emerging trends in Engg and Technology Industry 4.0 (ETETI-2023) at Indira Gandhi Institute of Technology Sarang, Odisha India. Paper is accepted and on 24th May-2023, I have delivered my Presentation, Paper will soon published by CRC Press Taylor & Francis Group. So I requesting to you reimburse the registration fee. I shall be very thank full to you supporting documents are attached with applications

Regards.

Vijay Kumar
Asst. Prof.
Ch department
AGC, Amritsar.

sujit pradhan <sujitpradhan@igitsarang.ac.in>
to me

Dear Author,

Paper ID: 61

Title: Experimental research on the flexural strength of strengthened composite beams

Congratulations!!!

On behalf ETETI-2023 Technical Program Committee, we are pleased to inform you that your paper with the entation at the International Conferences on Emerging Trends in Engineering and Technology-Industry 4.0 th May 2023.

The copyright form, guidelines to author attached herewith for your reference. Please address these con nuscript.

In order for your paper to be included in the conference proceedings, your final manuscript must compil & Francis guidelines.

. Further it is also required to submit through the prescribed Google Form: <https://forms.gle/FzBYghcBzqXAr>

The acceptance of your paper is subject to registration for the conferences and presentation of paper to take this opportunity to thank you for choosing ETETI-2023 to present your research works. Please feel free to contact us for any clarification, if required. Look forward to the pleasure of mee uring the ETETI-2023 conference.

26 Experimental research on the flexural strength of strengthened composite beams

Vijay Kumar^a

Department of Civil Engineering, AGC Amritsar, Amritsar India

Abstract

The degradation of structures, which is primarily caused by corrosion, is one of the issues that the building and construction sector is currently dealing with. Ferrocement and fiber-reinforced polymers are becoming increasingly important to increase the strength of concrete members and so solve this issue. To check flexural behavior of traditional beams reinforced with steel bars and hybrid beams made of ferrocement and glass-fiber reinforced were casted. The 900mm-long beams had a rectangular cross-section that measured 210 mm in width and 380 mm in depth. A total of 12 beams were casted and three beams served as control examples. In order to strengthen the beams, GFP laminates, ferrocement, and GFP plus ferrocement were all used to strengthen the remaining beams. Two-point bending over an 840mm clear span was used to test the beams for flexure failure. The results of load carrying capacity and failure mode are presented. Traditional reinforcement concrete beams, ferrocement, and GFP strengthened beams as well as a mixture of GFP and ferrocement beams were compared in terms of experimental outcomes. The results of the trial demonstrated that GFP and ferrocement had a higher load-carrying capability than other beams.

Keywords: Glass fiber polymer, ferrocement, fiber reinforced polymer, reinforcement, reinforced concrete

Introduction

Strength, stability, serviceability, and safety are major factors, as per structural applications (Abdullah et al. 2003). Many structures are built in developing nations using outdated codes. However, new codes state that this construction is unsafe. These structures need to be replaced, which takes time and money. All those structures need to be maintained in order to increase their lifespan. These structures require a lot of time and money for a replacement (Xiong et al., 2011). The technique and materials chosen to improve the strength and serviceability of the construction are a major source of concern. The lightweight construction of structures must be preferred about earthquake and wind pressures (Reddy et al., 2013). The structure should have sufficient stiffness and flexibility from the perspective of earthquake design in order to withstand those forces. Ferrocement and FRP have characteristics that are connected to wind and seismic forces (Makki et al., 2014; Nordin et al., 2004). Lightweight materials that can be utilized as reinforcement for concrete buildings include ferrocement and fiber-reinforced polymers. Most structures are built to be safe, stable, and able to withstand external loads (Nassif et al., 2004).

The literature study led to the conclusion that externally bonded GFP and ferrocement can significantly boost a member's strength. The member to which externally bonded ferrocement is attached is more ductile as a result.

Objectives

1. To evaluate the strength development of composite beams strengthened with a Glass fiber cloth, ferrocement, and their combination.
2. To study cracking behavior of strengthened beams with a glass fiber cloth, ferrocement, and their combination.
3. Correlation of the outcomes.

Methodology and experimental work

"Investigation of flexure capacity of members those are strengthened by utilizing ferrocement and GFP laminates" is the focus of the experimental effort. The dry bonding technique is used to apply ferrocement and GFP over a reinforced concrete beam (Biggs et al., 1972). The casting of controlled beams and ferrocement beams, the beams were covered with GFP and allowed to dry for the appropriate amount of time in accordance with the code provision. A total of 12 RC beams with a 400 mm × 210 mm cross-section and a 900 mm length are cast.

After proper curing according to provision of code, strengthening of beams done. For strengthening of nine beams single layers in U-shaped ferrocement and GFP were used.

Experimental work

Examining the flexure behavior of the beams reinforced and strengthened with GFP cloth and ferrocement the casting of reinforced concrete beams comes first. After controlled beams have been cast and reinforced beams have been properly dried in accordance with statutory requirements, GFP cloth is next applied on top of the beams (Maariappan et al., 2013). Applying GFP cloth with the aid of a stronger adhesive or any other adhesive will enable it to be joined to concrete and steel beams (ACI Committee 549-1R-88 et al. 1988).

Materials

Steel wire mesh, glass fiber polymer cloth, adhesive, reinforced bars, water, fine aggregates, coarse aggregates, cement, etc.

Results and discussion

Research work, to study the flexural capacity of RC beams and GFP and ferrocement strengthened beams. The dry bonding process was used to apply GFP cloth and ferrocement. Ferrocement and GFP cloth applied in U-shape and in single layer. Load was applied at two points on the beams to check the flexural capacity of beams. It is

Table 26.1: Number of samples.

S. No	No of reinforced concrete beams	No of strengthened by GFP	No of strengthened by ferrocement	No of combination of GFP + ferrocement
1	03	03	03	03

Source: Author

emphasized that ferrocement shows good tensile and ductility properties. It is noticed from experimental work, load carrying capacity of strengthened beams by ferrocement increased and it also shows minor cracks before failure. From results it is also noted that GFRP strengthened beams also show enhancement in load carrying capacity but compare to ferrocement strengthened beams it is less.

Conclusion

The flexural resistance capacity of beams was significantly enhanced by effectively bonding ferrocement and glass fibre polymer. Ferrocement + GFRP bonding produced better outcomes for boosting beams' capacity to carry loads. Ferrocement beams were able to carry higher weight than GFRP-strengthened beams. Compared to control beams and GFRP beams, beams strengthened with ferrocement showed a higher flexural resistance capacity. As intended, all the beams cracked in flexure. The layers of GFRP and ferrocement play a role in providing resistance against the development of cracks in the beams. Flexure cracks are seen to appear all along the height of the beam.

Table of Contents

1. Design of integrated visible-light communication-free space optics under diverse climate conditions
2. Evaluation of strength properties of stabilized black cotton soil using bamboo leaf as biomass
3. Response of asymmetric building under different soil-foundation conditions incorporating soil-structure interaction
4. Laboratory investigation of aggregates in gardez city for road construction suitability;
5. Optical absorption and FTIR analysis of ZnSiPVA nano-composites
6. Load sharing between group of two floating granular piled rafts - an analytical study
7. An integrated approach to explore the suitability of surface water for drinking purposes in Mahanadi basin, Odisha
8. A comparative performance study on fly ash based geopolymer by varying activator and class of base material
9. A smart scheduling: an integrated framework under cloud computing environment
10. Studying wind effect on high-rise building with different cross-section
11. Modelling of preforming design criteria: closed-die forging of axi-symmetrical cylindrical aluminum pre-forms
12. The influence of carbon content on low-carbon steel corrosion rates in water cooling synthesis
13. Effect of cross anisotropy of pavement materials on flexible pavement response subjected to various subgrade modulus
14. Performance evaluation of four-lobed powder lubricated bearing
15. Comparative seismic assessment of existing structures using P-delta effect in Indian context
16. Innovative cement-free concrete utilizing 100% recycled aggregates for sustainable construction
17. Study on effect of damage location and severity on dynamic behavior of multi-storey steel framed structure
18. Performance analysis of internal fin concentric pipe heat exchangers
19. Fault detection of rolling bearing using artificial neural network and differential evolution algorithm
20. Application of machine learning models in Mahanadi River basin, Odisha for prediction of flood
21. Hydraulic conveying through the slurry pipeline: environment-friendly safe disposal of Indian coal fly ash
22. Study and prediction of built-up land use for Bhubaneswar and its corresponding eff: ts
23. Streamflow prediction in a river using twin support vector regression and extreme learning machine
24. Seismic stability analysis of a small scaled hill slope reinforced with geogrid
25. Role of additive and fine particle addition in the rheology of coarse bauxite slurry
26. **Experimental research on the flexural strength of strengthened composite beams**
27. Impact of marble powder, silica fume, and steel fiber on fresh and hardened attributes of cement concrete
28. Waste plastic management and utilization in road construction: a review
29. Seismic response analysis and evaluation of vibration control of high-rise structure
30. Heat transfer analysis during the turning process under an air-assisted water-cooling environment
31. Performance evaluation of various concrete mixes: A new mix proportioning methodology for high-volume fly ash based concrete design mixes
32. Investigation on compressive strength of ultra-high-performance concrete (UHPC) under autoclave curing

To

The Head

Applied Science Department
AGC, Amritsar.

Respected Madam,

With due regards it has been shared that I have presented a paper in the 2 days (16-17 June, 2023) National Seminar on organic farming for sustainable development organized by AGC, Amritsar. As per college policy, I am liable to get the reimbursement of registration fee (Rs 500/-). I have been asked to produce the proof of the transaction made for the registration fee. I am unable to produce the same as I have forgot the mode of payment I followed. The receipt issued to me is misplaced. You are requested to take the necessary action for the reimbursement of my registration fee.

Thanking You

Yours faithfully

Kejriwal Kam

Assist. Prof.

Department of Applied
Science.

CROP PROTECTION FROM CHEMICAL FERTILIZERS AND PESTICIDES BY NATURAL EXTRACTS OF PLANTS FOR QUALITY FOOD AND SAFETY

Rajbir Kaur

Assistant Professor, Department of Applied Sciences, Amritsar Group of Colleges, Amritsar

ABSTRACT

The emerging demand for organic agriculture is a great concern globally. Consumers at the priority level are a demand of green food produce. That is the food crops produce without the use of pesticides, chemical fertilizers or chemical residues. Organic agriculture for sustainable development will produce abundant food without depleting the earth's resources or polluting the environment and will secure long term ecological productivity without degradation of their natural resource base and impoverishment of human health.

Modern agriculture is in demand of more sustainable, more productive, and more eco-friendly food produce. Food quality degradation and safety tend to shift agriculture practices to organic farming to overcome health related issues generated by the frequent use of pesticides and chemical fertilizers. The use of chemical residues has degraded the edaphic factors of soil, water, and nutrient requirements by crop plants. Techniques of use genetically modified crops have enhanced crop production and resistance to some diseases. The use of genetically modified crops poses a threat to human health in the way of allergic reactions, not only this it leads to disruption of biodiversity, and its cost of production is a barrier on the way. Pesticides like Acephate, Acetamiprid, Beeta cyfluthrin, Bifenthrin, Glyphosate, Metaldehyde, Propoxur, Boric acid, Diazinon, Deltamethrin, Malathion, etc., and Chemical fertilizers like Urea, Diammonium Phosphate, Nitrogen, Potash, Sulphur & Single Superphosphates are used to increase the yield of crops and also to maintain the shortage of nitrogen, phosphorus, and potassium in the soil. Various species loss including birds, beneficial insects, and non-target plants results due to direct exposure to pesticides and chemical fertilizers on crops. Maintenance of ecological balance of nature, reduction in the loss of biodiversity, and pest-crop natural relationship can be maintained by the way of applying organic agricultural practices. Organic agriculture will target growing crops & naturally beneficial means that will lead to sustainable development. Growing Staple, Edible oil, Fibre, & vegetable crops such as Wheat, Paddy, Maize, Barley, Cotton, Jute, Sugarcane, Chillies Okra, Potato, Tomatoes, Peas, Grams, Sunflower, Mustard, Groundnut, etc. without using pesticide and fertilizers but by means of natural plant extracts and replenishing the soil by the help of naturally occurring microbes to step further sustainability.

INTRODUCTION

Past generations tried to solve the problems related to different crops in natural ways. These practices ensure maximum profits, no harmful effects, and minimum risks. About sixteen essential nutrients are required for growth of crops which includes Nitrogen, Phosphorus, Potassium, Magnesium, Sulphur, Calcium, Manganese, Boron, Molybdenum, Zinc Copper, Chlorine, Nickel, and Cobalt, etc. These nutrients are vital for crop production, the agriculturally beneficial microorganism may also contribute directly (biological nitrogen fixation, Sulphur oxidizing bacteria, proteolytic microorganisms, phosphorus solubilization, and phytohormone production). The use of microbes for the replenishment of soil and enhancing production of foodgrains promote sustainable development and eco-friendly entrepreneurship. The use of organic extracts obtained from plants by different means can be beneficial to supplement the growing demands of organic farming. To meet the requirement of organic farming different practices are to be followed such as Conversion, Mixed Farming, Cropping pattern, Planting, and Manuring. Inorganic fertilizers use chemical compounds to increase the yield of crops if the same is met by replenishing in natural ways then health-related issues can be reduced by producing good quality food, the need of the hour and ensuring what is being eaten must be pure, safe, and nutritious. The role of different fertilizers, how they promote growth, how they affect, and how their role can be overcome.

AMRITSAR GROUP OF COLLEGES

2 Days National Seminar

on

Organic Farming for Sustainable Development

(Sponsored by ICSSR N.W. Regional Centre, Chandigarh)

16th-17th June, 2023

ABOUT THE COLLEGE

Amritsar Group of Colleges (AGC), formerly known as Amritsar College of Engineering & Technology/ Amritsar Pharmacy College was established by Amritsar International Education Trust in 2002. This premier institute has been duly approved by AICTE/PCI. AGC with its magnificent environment and superior learning system is ranked among the best colleges in North India. AGC is affiliated with Punjab Technical University, Kapurthala, and accredited by the National Board of Accreditation (2009-12 & 2016-18) and the National Assessment & Accreditation Council (NAAC) with Grade 'A'. AGC became the first private Autonomous Engineering College in Punjab on 19th June 2014. Its tremendous growth in a short period explicates its success in the education sector. The institute endeavors to educate the students to become not only competent professionals but also excellent human beings who contribute towards the welfare of the society and raise the quality of life of its people. The Institute has been established with a noble aim and vision to produce professionals of the highest caliber and values for industry and society.

ABOUT THE DEPARTMENT

Department of Management Studies is one of the elite departments of AGC, functioning since 2004. The department offers a Postgraduate Programme: Master of Business Administration, and three Undergraduate programs: B. Com (Honours), Bachelor of Business Administration, and Bachelor of Arts (Journalism & Mass Communication). The Department shares the vision and mission of the institute in imparting high-quality education to the students. The Department is equipped with well-qualified and experienced faculty to enhance the students' managerial skills and professional attitudes that enables them to face the challenges in their professional career.

ABOUT ICSSR

Indian Council of Social Science Research (ICSSR) was established in 1969 by the Government of India to promote research in social sciences in the country. ICSSR provide grants for projects, fellowships, international collaboration, capacity building, survey, publications etc. to promote research in social sciences in India. ICSSR has developed ICSSR Data Service for promoting a powerful research environment through sharing and reuse of data among the social science community in India.

SEMINAR OVERVIEW

In the modern age, the increasing population is a critical challenge to achieve sustainable development in every sphere. Organic farming through sustainable agriculture meets not only the food requirements of present generation but also the requirements of future generations. Organic farming consists of environment-friendly, animal and plant-based organic resources that enriches nutrients required for crop plants. It is an efficient and promising approach for bringing up the sustainability as it provides optimum use of natural resources, yield stability, improved soil health, pollution free environment, organic food and reduced use of synthesized fertilizers.

Keeping this in mind, we seek to evaluate the contribution of organic farming to the social, economic and ecological roles of sustainable development.

CALL FOR PAPERS

Academics and students are invited from practitioners, academicians, research scholars and students on the theme of organic farming for sustainable development. Authors can submit their research papers/manuscripts on any of the below-

SUB-THEMES

- Agro-friendly microbes and their metabolites for Sustainable Development
- Prospectus of Organic Agriculture in Food Quality and Safety
- Sustainability assessment of rice under the Organic production system
- Sustainable post-harvest management practices for fresh produce
- Health, environmental and economic benefits of Organic farming
- Sustainable agriculture in agro-based industries in Punjab.
- Insect pollinators and Sustainable Development
- Agriculture in the era of climate change
- Organic agriculture movements
- Initiatives are taken by the government for promoting organic farming
- Opportunities and Challenges in organic agriculture
- Marketing and policy support for agriculture
- Public, and private partnerships in organic agriculture
- Scope, issue, and options for organic agriculture in different agro-based eco-systems
- Soil fertility and productive management
- Soil recovery mechanism
- Challenges and innovative approaches in crop improvement
- Sustainability through green economic growth
- Role of Microfinance in Promoting Sustainable Development
- Impact of agriculture marketing on the development
- Role of CACP (Commission for agricultural cost and Prices) in deciding the MSP
- Credit and banking system for agricultural growth
- Effects of sustainable human resource practices in organic farming
- Sustainable Development.

Note: The sub-themes are just indicative and not exhaustive. Any other sub-themes related to the topic can be considered.

All submitted manuscripts will undergo a peer review process to ensure a high-quality standard. Prospective and interested authors can submit a full manuscript of the proposed work relevant to the theme(s) of the seminar before the deadline.

IMPORTANT DATES

Last date for Abstract: **22nd May 2023**
Notification for acceptance: **26th May 2023**
Last date for the Full Paper: **31st May 2023**.

*** Papers received by 31st May 2023 will be considered for publication in the edited book with ISBN.**

Send Papers on Email: ofs@acet.edu.in

REGISTRATION FEE

For the Academician: INR 500

For the Students & Research Scholars: INR 300

Registration link for Seminar:

<https://agcamritsar.in/icssr-national-seminar/>

Guidelines for Paper Submission:

- Abstract should not be more than 300 words.
- The paper should include four subsections: Topic, abstract, main body, and references.
- The details of the author(s) include the Name, Designation, Affiliation, email, and contact number of all the authors (All authors will have to register separately).
- Length of the paper should be 2500-3000 words.
- The paper should be typed in MS-WORD, 12 font size (heading 14 sizes), Times New Roman font style, 1.5 spacing.
- The reference should be written according to the APA style.
- The paper should be checked for plagiarism not exceeding 10%.
- Table and figures should be indicated by number separately (Table 1).
- Maximum Authors allowed per paper-3 (all Authors will have to register separately).
- Paper Presentation Certificates shall be provided to all the Registered Author(s) of the accepted papers.
- No TA/DA will be given to the out-station participants selected for presentation.
- The abstract and paper should be sent at ofs@acet.edu.in
- **Participants have to pay an additional amount of Rs. 700/- for hard copy of their publication with ISBN.**

2 Days National Seminar

on

Organic Farming for Sustainable Development

(Sponsored by ICSSR N.W. Regional Centre, Chandigarh)

16th -17th June, 2023

Certificate of Participation

Certified that Mr./Ms./Dr. Raybir Kaur
Department of Applied Sciences of Amritsar Group of Colleges, Amritsar
has Participated / Presented a Paper / Delivered Keynote Address / Chaired a Session in two
days National Seminar on Organic Farming for Sustainable Development conducted by Amritsar
Group of Colleges, Amritsar during 16-17 June 2023. The title of presentation was
Soop protection from Chemical fertilizers and pesticides by Natural extracts of plants.
